## **ABOUT THE ROLE**

Today's consumers expect applications that truly make life easier. By hiring determined visionaries who understand users, their goals, and the underlying technology, we conceive and create delightful and clever applications that revolutionize everyday tasks.

This robust development team within SAP d.studio helps build tools and platforms needed to scale design. The chosen candidate will work with various stakeholders to come up with solutions for different business needs - product managers, designers, researchers, architects, and other developers.

## **WHERE?**

Located in the hills of sunny Palo Alto, California, we are right in the heart of Silicon Valley.

## **ABOUT SAP**

As a market leader in enterprise application software, SAP helps companies of all sizes and industries innovate through simplification. From the back office to the boardroom, warehouse to storefront, on premise to cloud, desktop to mobile devices—SAP empowers people and organizations to work together more efficiently and use business insights more effectively to stay ahead of the competition. SAP applications and services enable customers to operate profitably, adapt continuously, and grow sustainably.

## What You'll Do

- + Quickly learn new technologies with guidance from senior architects and developers
- + Work on full-stack development—UI, middleware, and backend
- + Work closely with peers in a world-class product development organization to continually improve the quality and usability of components through an agile development process

## What You Bring

- + Recently completed or working towards a degree in computer science engineering, software development, or other related fields
- + Proficient with JavaScript programming
- + Quick learner with a passion for solving tough problems

- + Independent, highly motivated, energetic with strong verbal and written communication skills
- + Must be able to work onsite in Palo Alto, CA

## Nice To Have

- + Experience in any content-management system and Angular JS
- + Knowledge in computer science fundamentals and algorithms
