WHY D.STUDIO?

We are a highly innovative and creative team found within the walls of SAP, the world's largest software-cloud company.

Here at d.studio (formerly known as AppHaus), we celebrate diversity across cultures, hobbies, and disciplines. We enjoy a light-hearted, casual environment that allows different personalities and work styles to thrive. And we all agree to never take ourselves too seriously.

Collectively, our capabilities allow us to influence all aspects of the design process. Our skills involve research, interaction design, visual design, product management, and development... Told you, we do a lot of stuff. And yet we all come together with one main purpose. From the first sticky notes of a design-thinking workshop, to the last lines of code, our goal is to design, develop, and deliver high-quality products.

WHERE?

Located in the hills of sunny Palo Alto, California, we are right in the heart of Silicon Valley.

ABOUT SAP

As a market leader in enterprise application software, SAP helps companies of all sizes and industries innovate through simplification. From the back office to the boardroom, warehouse to storefront, on premise to cloud, desktop to mobile devices—SAP empowers people and organizations to work together more efficiently and use business insights more effectively to stay ahead of the competition. SAP applications and services enable customers to operate profitably, adapt continuously, and grow sustainably.

ABOUT THE ROLE

At SAP d.studio, user research is core to software design and development.

Today's consumers expect applications that truly make life easier. By hiring creative visionaries who understand users, their goals, and the underlying technology, we conceive delightful and clever applications that revolutionize everyday tasks.

By working collaboratively with a robust user experience team, you'll be the ultimate creative facilitator. You'll help users achieve their goals without them thinking about how they interact with the design ideas you propose, fight for, and lead to fruition. We'd love our team members to have the kind of contagious energy for innovation where we can't help but inspire breakthrough ideas while elevating the collective spirit of the team.

What You'll Do

+ Support the design team in planning and conducting user research activities at every stage of the product lifecycle

+ Communicate insights and lead the synthesis process with cross-functional teams and customers

+ Contribute to synthesizing data to extract actionable insights, which can be translated into product design

+ Facilitate user research sessions including planning, conducting, and documenting

+ Help shape the design team's research techniques and goals

+ Identify and contact the target audience for conducting research

+ Collaborate with fellow interaction designers, visual designers, user researchers, product owners, and developers

What You Bring

+ Recently completed or working towards a degree in human-computer interaction, interaction design, anthropology, psychology, or other related fields

+ Empathy and passion for people

+ A natural skill for engaging at a deep level and fostering this passion in the team

+ Prior experience with UX research methods and techniques, such as field research, usability studies, participatory design, surveys, experimental design, etc.

+ Ability to work in a fast-paced environment, moving nimbly between projects and tasks

+ Excellent oral and written skills, and a demonstrated proficiency in effective communication with product stakeholders and research subjects

Nice To Have

+ Previous internship or related experience in user research, interaction design, and/or product management

+ Exceptional portfolio showcasing a wide range of UX research, interaction design, and/or product design work

+ Familiarity with interaction design and prototyping tools and techniques
